

# Protective Hygiene Roller Blind Kit

SAFE SPACE™

20/20

## Brief Solution Overview

COVID-19 and many respiratory illnesses are spread through infected droplets from a sick person's mouth or nose. Safe Space 20/20 is a flexible and versatile protective barrier system designed to help prevent the spread of germs in all kinds of indoor spaces—especially in places where it is not possible (or feasible) to install a fixed physical barrier on

the floor or raised surface, and in crowded office environments where floor space is at a premium.

The use of any physical protective barriers should be combined with the other important preventative measures such as frequent hand washing, physical distancing, and wearing masks or face coverings.

The Protective Hygiene Roller Blind Kit Includes:

- The Safe Space 20/20 roller blind
- Long-lasting rechargeable battery motor & plug in recharger
- Mounting screws
- Installation guide
- 1-Year warranty

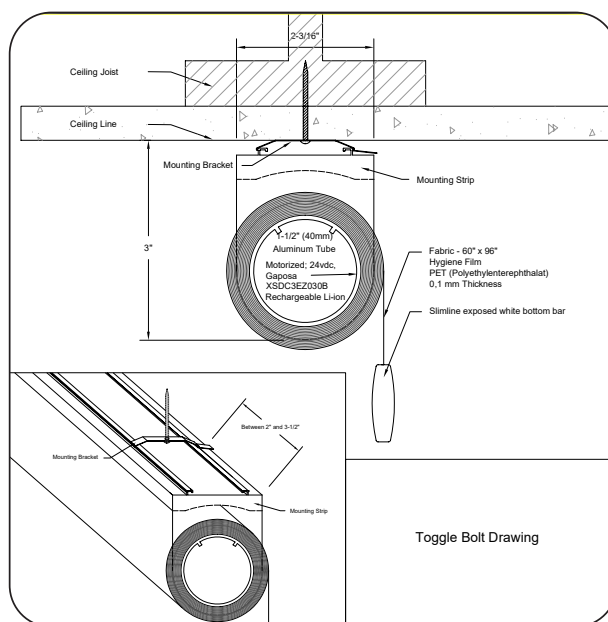

## Who Can Benefit from this system?

- Office & Commercial Applications
- Reception Desks
- Client Meeting Spaces & Rooms
- Customer Service Counters
- Retail Checkout Counters
- Restaurants & Bars
- Classrooms (Educational Facilities)
- Doctors' Offices & Medical Clinics
- Sport Centers & Gyms
- Hospitals
- Hotels
- Libraries

## Why Do You Need It?

- Our roller blind system protects your staff and customers from diseases, germs, viruses and harmful microorganisms. Making your facility safe is essential to keeping employee and customer trust, and getting your business back on track.
- Space is at a premium and every inch of space is needed in order to achieve and maintain profitability. It may not be possible to increase the space between people, so a separation screen is a must.
- Our system is an exclusive, light-weight, functional and durable roller blind kit that takes you a few minutes to install. Additionally, it adds a luxurious finish to your space.
